Bush tucker, or bush food, is any food native to Australia. The Australian Aboriginals used the environment around them for generations, living off a diet high in protein, fibre, and micronutrients, and low in sugars. Much of the bush tucker eaten then is still available and eaten today. We guide you through it here.

A Guide To Bush Tucker, Australia's Native Foods

We have over 1,700 species of native bees in Australia. They come in an impressive range of sizes and in a dazzling array of colours. -- Our largest species, the Great Carpenter Bees, are ten times longer than our smallest species, the Quasihesma Bees (see photo)! -- Native bees can be furry or shiny, and they can be black, red, yellow or brown.
