ABSTRACT In this article I propose a model that posits three major sources of influence on behavior—basic human nature (via universal psychological processes), culture (via social roles), and personality (via individual role identities) and argue that individual behaviors are the products of the interaction between the three. I discuss how culture emerges from the interaction of basic human nature and the ecological contexts in which groups exist, and how social roles are determined by ...

High-Context Cultures. A high-context culture relies on implicit communication and nonverbal cues. In high-context communication, a message cannot be understood without a great deal of background information. Asian, African, Arab, central European and Latin American cultures are generally considered to be high-context cultures.

### Intercultural Communication: High and Low Context Cultures

CULTURE AS A SYSTEM OF BEHAVIORS According to Brown (1991), “culture consists of the conventional patterns of thought, activity, and artifact that are passed on from generation to generation” (p. 40). Thus, if a society demonstrates a recognizable pattern of activity, such as rice cultivation, that is part of its culture.

### THE CONCEPT OF CULTURE

Even if culture is a primary factor in our lives, and that largely depends on the person's receptivity to culture, it would be nearly impossible to create a culture ahead of time that is conducive to producing better behavior and healthier thoughts.
