lathe spindles into a rotary axis. C - Axis PUMA Turing centers equipped with a turret and driven tools normally employ a rotary axis, called the C-axis. The main spindle motor drives the rotary axis. A position-encoding device attached to the spindle provides for positioning of the rotary axis at 0.001-degree resolution.

It was founded in 1967 and had been producing the Puma lathe since 1980. Both Doosan and Daewoo are Korean companies. The Daewoo group failed in 1998 due in large part to the 1997 Asian financial crisis. Doosan CNC entered the US market in 1996. As a Korean manufacturer, they had to fight the perception of being low-end.
