The Relationship Between Architects and Building Materials ...

This means if the architect costs 15 percent of the construction cost, and all of the building material is going to cost \$100,000 than the architect receives \$15,000 as a fee. 15 percent is a bit on the high side, but this is usually only charged by the top-of-the-line architects.

What Does An Architect Cost And How Do They Determine Fees?

Public buildings are often designed to make a statement about a city. They call to mind certain feelings, events or landscapes that resonate with residents and visitors. They accentuate or contrast with surrounding landscapes, and they often develop an identity all of their own. In this article, we look at some of the most beautiful - and definitely the most interesting - civic buildings ...

Architecture, particularly public architecture, develops in response to a government and its people. Laws, technological advances, symbolic needs, functional requirements, and social aesthetics also exert strong influence. To understand the impact these influences had on architecture provides insights into how and why it changes over time.
