### ISI Impact Factor (IIF)

The impact factor or journal impact factor of an academic journal is a scientometric index that reflects the yearly average number of citations that articles published in the last two years in a given journal received. It is frequently used as a proxy for the relative importance of a journal within its field; journals with higher impact factors are often deemed to be more important than those with lower ones.

### Impact factor - Wikipedia

We introduce generalized impact factor, which involves the historical citation observed, and potential future citation of a journal. It can be used to assess the journal influence dynamically.
