Kidney Dissection Mini Lab

YOUR GUIDE TO DISSECTION Since 1817 Dissecting a Kidney By examining and dissecting a kidney, students can gain a greater understanding of the structure of the organ, the texture of the components and the way it connects and works within the body. The Kidneys produce urine from waste products and excess water.

YOUR GUIDE TO DISSECTION - Philip Harris

1. Lay a few pages of newspaper on the bench and put the dissecting board on them. 2. Place the kidney on its side on the dissection board and carefully remove the fat from around the kidney. 3. Arrange the kidney so that the renal sheath, which contains the ureter, is located to the bottom right (see Figure 2).

Dissection of a Kidney - Mrs Scriven's Virtual Classroom

DESCRIPTION. Study mammalian organ anatomy as you dissect the four preserved specimens in this kit: a cow eye, sheep heart, sheep brain, and sheep kidney. This complete dissection kit includes full-color photographic dissection guides for all four specimens, a magnifying glass, disposable styrofoam trays, a scalpel and dissecting scissors, and more dissecting tools (expand the Contents tab below for a full list of included items).

Animal Dissection - Mammal Organs Specimens for Biology

Prior to starting this dissection, get students to observe a diagram of the lungs. As you cut through it, ask students to identify differences between the diagram and real lungs. The first thing you will see when you look at the pluck will be the heart, lungs and liver. Observe the picture to the right.
