Tuningless Feature Configuration Quick Start 1. In the Controller Organizer, right-click an axis and then choose Properties. 2. Under the Load category, select Compliance. 3. From the Adaptive Tuning Configuration pull-down menu, choose Tracking Notch.

Tuningless Feature Configuration Quick Start

Configuring OID 11.1.1.6 connector in OIM 11.1.2 for direct provisioning: There is a big change in the way direct provisioning is done from OIM (Oracle Identity manager) to OID (Oracle Internet Directory) using OIM 11.1.2 connectors.

How to Configure OID 11.1.1.6 Connector in OIM 11.1.2

The most important configuration is Roll and Pitch tuning, as this is essential for responsive and stable flight as well as effective navigation. The best way to tune the roll and pitch is to use Automatic Tuning with AUTOTUNE (a flight mode that uses changes in flight attitude input by the pilot to learn the key values needed). Tip.
