Open Source Intelligence In A

Open-source intelligence is a multi-methods methodology for collecting, analyzing and making decision about data accessible in publicly available sources to be used in an intelligence context. In the intelligence community, the term "open" refers to overt, publicly available sources. It is not related to open-source software or collective intelligence. OSINT under one name or another has been around for hundreds of years. With the advent of instant communications and rapid information transfer,

Open-source Intelligence - Wikipedia

Open source intelligence is derived from data and information that is available to the general public. It's not limited to what can be found using Google, although the so-called "surface web" is an important component. As valuable as open source intelligence can be, information overload is a real concern.
