I will pay dearly for a manual (or scan) for the Panasonic VP-8131A Stereo FM Generator. Basic operation seems straightforward (much like a Fluke 6060 or an HP 3325), but I'd like to know how to use the more advanced functions. Thanks in advance for any help or leads - I've already found the spec sheet, etc.

The VP8122B is a 280 MHz RF Generator from Panasonic. An RF generator is a tool engineers use to generate sinusoidal outputs while testing electronic equipment. The output will automatically have its frequency varied or swept between frequencies. A "sweep" is one complete cycle of a frequency variation.
