to the total tractor sump. My hobby is tractors and I go thru them so often, I can't remember how much I put my TO-20. The TO-20 that I had was a fine machine and everything worked. The little Continental 134 cu in engine started and ran like a top; a tough puller too for it's displacement. You put a load on her and the governor opened the ...

In most modern tractors, especially those built after 1980, the hydraulics and transmission draw fluid from the same reservoir. These tractors require a trans-hydraulic fluid. This simplifies things. Different tractor manufacturers have different specifications for the trans-hydraulic fluids that should be used in their equipment.
